
20 October 2016

Comisionado General Frank Alexis Abrego
Director Nacional del Servicio Nacional de Frontera

Dear general Frank Alexis Abrego

I am writing to you, for the aim of requesting permission from yourself to enter the Darién region by going to the town of Yaviza, Jaqué with the sole aim of educating individuals back home in the UK, and the rest of the world, of the biodiversity for the region as so little is known of it. As this is my sole passion as I have worked in other countries from Australia, Indonesia and Costa Rica, I would also like the opportunity to be able to cross the border into Colombia if this is not an option I understand due to the many dangers. But I also understand the dangers of such a project. I will have the necessary equipment and know how as I have travelled in similar environments in the past I have decided on three possible routes with the intention of seeing the most natural history. And a detailed route from a GPS device can be provided to yourself and advice can be offered from the organisation if you wish, with which route you would advise or not. I am fully aware of what I am going to be attempting and with your organisation and a blessing from the SENAFRONT this project can only be accomplished. As I have put a lot of time into researching past and current expeditions in the area, also I have acquired the most recent maps, of the region. The attempt will be end of February next year and from the start day of the proposed route I aim not to be in the Darién for more than 15 days, the project will only consist of myself. And will be regularly giving updates to the authorities. I have also dedicated a webpage for my day to day updates or when is possible. I will also present myself to the office in Corozal as soon as I enter Panama. So please consider my request as I only have intentions of educating people of the region, which is only possible from your organisation.

P.S; A letter can be received in Spanish if this is more appropriate.

Sincerely yours,

Daniel Eggington
